CONTENTS

Volume 52, Issue Nos. 1–12 (2001)

International Journal for

NUMERICAL METHODS IN ENGINEERING

Issue Nos. 1–2

Special Issue on '5th U.S. National Congress on Computational Mechanics
Guest Editors: Kaspar Willam and Stein Sture

Preface: K. William and S. Sture 1

Computability in non-linear solid mechanics: T. Belytschko and K. Mish 3

Advances in computational design and optimization with application to MEMS: B.-C. Chen, E. C. N. Silva and N. Kikuchi 23

Some recent issues in computational failure mechanics: R. de Borst 63

Three-dimensional cohesive modeling of dynamic mixed-mode fracture: G. Ruiz, A. Pandolfi and M. Ortiz 97

A micro–macro and parallel computational strategy for highly heterogeneous structures: P. Ladevèze, O. Loiseau and D. Dureisseix 121

A computational scheme for linear and non-linear composites with arbitrary phase contrast: J. C. Michel, H. Moulinec and P. Suquet 139

papers in this journal are available online
ahead of the print issue

The *International Journal for Numerical Methods in Engineering* is covered by the following abstracting and indexing services: Applied Mechanics Reviews, BHRA Fluid Engineering Centre (Elsevier), Cambridge Scientific Abstracts/Materials Information, CompuMath Citation Index (ISI), Current Contents®/Engineering, Computing & Technology (ISI), Earthquake Engineering Abstracts (NISEE), Ei COMPENDEX PLUS, Ei Page One, Geobase (Elsevier), Geotechnical Abstracts (Geotext Services), Indian Society of Earthquake Technology Bulletin, INSPEC, International Aeronautical Abstracts & Database (AIAA), International Civil Engineering Abstracts (Anbar), International Petroleum Abstracts, ISI Alerting Services, Materials Science Citation Index (ISI), Mathematical Reviews, Mechanics, PASCAL Database (INIST), Science Citation Index Expanded (also known as SciSearch®) (ISI), Science Citation Index® (ISI), Shock & Vibration Digest (Sage), Tribology and Corrosion Abstracts, Zentralblatt für Mathematik/Mathematic Abstracts.

Multiscale damage modelling for composite materials: theory and computational framework: J. Fish and Q. Yu 161

Micromechanical analysis of quasi-brittle materials using fracture-based interface elements: I. Carol, C. M. López and O. Roa 193

AUTHOR INDEX 217

KEYWORD INDEX 218

Issue No. 3

Parameter identification with weightless regularization: T. Furukawa 219

Surface wavelets: a multiresolution signal processing tool for 3D Computational modelling: K. Amaratunga and J. E. Castrillon-Candas 239

Free vibrations of shear-flexible and compressible arches by FEM: P. Litewka and J. Rakowski 273

CLASSIC REPRINTS SERIES 287

Displacement and equilibrium models in the finite element method. B. Fraeijs de Veubeke. *INTRODUCTORY REMARKS BY O. C. ZIENKIEWICZ*

ANNOUNCEMENT 343

Issue No. 4

A numerical method for the determination of dextrous workspaces of Gough-Stewart platforms: L. J. du Plessis and J. A. Snyman 345

Accuracy of Galerkin finite elements for groundwater flow simulations in two- and three-dimensional triangulations: C. Cordes and M. Putti 371

On the classical shell model underlying bilinear degenerated shell finite elements: M. Malinen 389

A comparison of domain integral evaluation techniques for boundary element methods: M. S. Ingber, A. A. Mammoli and M. J. Brown 417

On a two-level finite element method for the incompressible Navier-Stokes equations: L. P. Franca and A. Nesliturk 433

An assumed strain triangular solid shell element with bubble function displacements for analysis of plates and shells: W. I. Hong, Y. H. Kim and S. W. Lee 455

Issue Nos. 5–6

Special Issue of Selected ECCM 99 Contributions
Guest Editors: Peter Wriggers and Walter Wunderlich

Editorial: P. Wriggers and W. Wunderlich 471

Toward large scale F.E. computation of hot forging process using iterative solvers, parallel computation and multigrid algorithms: K. Mocellin, L. Fourment, T. Coupez and J. L. Chenot 473

Numerical analysis of strain localization in metal powder-forming processes: R. W. Lewis and A. R. Khoei 489

Time- and space-adaptive methods applied to localization phenomena in empty and saturated micropolar and standard porous materials: W. Ehlers, P. Ellsiepen and M. Ammann 503

Constitutive relation errors for F.E. analysis considering (visco-)plasticity and damage: P. Ladevèze 527

Mathematical model of soil freezing and its numerical implementation: M. Mikkola and J. Hartikainen 543

Micromechanics of high temperature hydrogen attack: S. M. Schlögl and E. Van der Giessen 559

Computational structural mechanics: H. A. Mang, C. Hellmich, R. Lackner and B. Pichler 569

The efficiency of the *p*-version finite element method in a distributed computing environment: E. Rank, M. Rücker, A. Düster and H. Bröker 589

Finite element analysis for optimal design of foundations due to dynamic loading: S. Valliappan and A. Hakam 605

Formulation and evaluation of new triangular, quadrilateral, pentagonal and hexagonal discrete Kirchhoff plate/shell elements: J. L. Batoz, C. L. Zheng and F. Hammadi . . 615

AUTHOR INDEX 631

KEYWORD INDEX 632

ANNOUNCEMENT 633

Issue No. 7

A numerical model for the time-dependent cracking of cementitious materials: G. P. A. G. van Zijl, R. de Borst and J. G. Rots 637

FFS contact searching algorithm for dynamic finite element analysis: F. Wang, J. Cheng and Z. Yao 655

The *p*-version of the finite element method for three-dimensional curved thin walled structures: A. Düster, H. Bröker and E. Rank 673

On elimination of shear locking in the element-free Galerkin method: W. Kanok-Nukulchai, W. Barry, K. Saran-Yasoontorn and P. H. Bouillard 705

Local error estimates of FEM for displacements and stresses in linear elasticity by solving local Neumann problems: S. Ohnimus, E. Stein and E. Walhorn 727

An assumed strain triangular curved solid shell element formulation for analysis of plates and shells undergoing finite rotations: W. I. Hong, J. H. Kim, Y. H. Kim and S. W. Lee 747

Issue No. 8

A Galerkin/least-squares finite element formulation for consolidation: A. Truty 763

Instationary aeroelastic computation of yacht sails: H. Schoop and N. Bessert 787

Efficient computation of order and mode of corner singularities in 3D-elasticity: A. Dimitrov, H. Andrä and E. Schnack 805

A large-strain elasto–plastic shell formulation using the Morley triangle: A. S. Kolahi and M. A. Crisfield 829

Transient waves in plates of functionally graded materials: X. Han, G. R. Liu and K. Y. Lam 851

An efficient parallel procedure for the simulation of crack growth using the cohesive surface methodology: F. J. Lingen and M. G. A. Tijssens 867

Issue No. 9

An improved weighting method with multibounds formulation and convex programming for multicriteria structural optimization: W. H. Zhang, M. Domaszewski and C. Fleury 889

Application of two-state *M*-integral for analysis of adhesive lap joints: Y. Lee, N. S. Goo and S. Im 903

Topological aspects of meshless methods and nodal ordering for meshless discretizations: A. Yavari, A. Kaveh, S. Sarkani and H. A. R. Bondarabady 921

Optimal discretizations in adaptive finite element electromagnetics: S. McFee and D. Giannacopoulos 939

Evolutionary thickness design with stiffness maximization and stress minimization criteria: Q. Li, G. P. Steven and Y. M. Xie 979

The least-squares meshfree method: S.-H. Park and S.-K. Youn 997

Application of generalized differential quadrature rule in Blasius and Onsager equations: G. R. Liu and T. Y. Wu 1013

Convergence study of the truncated Karhunen-Loeve expansion for simulation of stochastic processes: S. P. Huang, S. T. Quek and K. K. Phoon 1029

ANNOUNCEMENT 1044

ANNOUNCEMENT 1045

ANNOUNCEMENT iii

Issue No. 10

Numerical simulation of one-dimensional flows through porous media with shock waves: M. L. Martins-Costa and R. M. Saldanha da Gama 1047

A Galerkin boundary integral method for multiple circular elastic inclusions: S. G. Mogilevskaya and S. L. Crouch 1069

A meshless method for Kirchhoff plate bending problems: V. M. A. Leitão 1107

An updated Lagrangian finite element sensitivity analysis of large deformations using quadrilateral elements: A. Srikanth and N. Zabaras 1131

Microplane finite element analysis of tube-squash test of concrete with shear angles up to 70°: M. Brocca and Z. P. Bažant 1165

Issue No. 11

Boundary elements for half-space problems via fundamental solutions: a three-dimensional analysis: J. Liang and K. M. Liew 1189

Remarks on tension instability of Eulerian and Lagrangian corrected smooth particle hydrodynamics (CSPH) methods: J. Bonet and S. Kulasegaram 1203

In-plane vibrations of shear deformable curved beams: M. Eisenberger and E. Efraim 1221

Stress resultant geometrically exact form of classical shell model and vector-like parametrization of constrained rotations: A. Ibrahimbegovic, B. Brank and P. Courtois 1235

Active control of FGM plates subjected to a temperature gradient: Modelling via finite element method based on FSDT: K. M. Liew, X. Q. He, T. Y. Ng and S. Sivashanker 1253

Efficient simulation of parameter-dependent vehicle dynamics: M. Stämpfle, K. J. Hunt and J. Kalkkuhl 1273

Shape optimization of axisymmetric preform tools in forging using a direct differentiation method: D. Vieilledent and L. Fourment 1301

An optimal control problem in estimating the optimal control force for the force vibration system: C.-H. Huang 1323

Hypersingular boundary integral equation for axisymmetric elasticity: L. A. de Lacerda and L. C. Wrobel 1337

Issue No. 12

Two-dimensional transonic aeroservoelastic computations in the time domain: L. Djayapertapa, C. B. Allen and S. P. Fiddes 1355

The performance of spheroidal infinite elements: R. J. Astley and J. P. Coyette . . . 1379

Fully stressed frame structures unobtainable by conventional design methodology: K. M. Mueller and S. A. Burns 1397

Finite element simulation of the steel plates hot rolling process: M. A. Cavaliere, M. B. Goldschmit and E. N. Dvorkin 1411

The computation of the exponential and logarithmic mappings and their first and second linearizations: M. Ortiz, R. A. Radovitzky and E. A. Repetto 1431

An algebraic two-level preconditioner for asymmetric, positive-definite systems: T. E. Giddings and J. Fish 1443

Singular perturbations for sensitivity analysis in symmetric bifurcation buckling: L. A. Godoy and E. G. Banchio 1465

Numerical integration of lattice rotation in polycrystal plasticity: S. Kok, A. J. Beaudoin and D. A. Tortorelli 1487
